Anoop P S

Senior Full-Stack Developer (PHP | Node.js | GraphQL)

9895979784 | Anoop ps | [GitHub](#) | [LinkedIn](#) | [anoopps.github.io/theweb](#)

Professional Summary

Full-stack Web Developer with 13 years of experience building scalable and secure web applications using PHP, MySQL, GraphQL, and modern backend technologies. Recently transitioned into Node.js, Express, MongoDB, and GraphQL development with multiple self-built projects on GitHub. Passionate about adopting modern JavaScript frameworks and eager to contribute to MERN-stack or GraphQL-driven projects in a growth-focused team.

Technical Skills

Frontend: HTML5, CSS3, JavaScript, React.js (Basics), jQuery, Bootstrap

Backend: Core PHP, Node.js, Express.js, REST APIs, GraphQL, CodeIgniter, Joomla, JWT

Database: MySQL, PostgreSQL, MongoDB, Sequelize, Prisma, Redis

Tools & DevOps: GitHub, SVN, AWS, Visual Studio Code, Postman, Agile Practices

Testing: PHPUnit, Chai, Jest

AI/IDE Support Tools: VS Code, GitHub, Copilot

Professional Experience

Senior Software Engineer
Citrus Informatics, Kochi - Jul 2019 – Present

- Designed and developed secure modules using Core PHP, GraphQL, and MySQL for the Citus Health Platform.
- Built centralized activity-tracking modules integrated with AWS SQS.
- Optimized legacy APIs and implemented PDO-based DB abstraction layer.
- Mentored new team members and reviewed code for quality.

Senior Software Engineer
Times World, Kozhikode - Jan 2019 – Jun 2019

- Worked on Laravel-based food delivery and prescription systems.
- Optimized backend logic and worked across cross-functional teams.

Web Developer

Karakas Technologies, Technopark - Dec 2017 – Oct 2018

- Customized the JOOMLA CMS User Management section extensively to meet specific business requirements.
- Developed custom components, integrated templates, and executed data migration and deployment tasks in JOOMLA..
- Diagnosed and resolved code issues while maintaining and enhancing the existing system for improved performance.
- Contributed creative ideas to make websites more interactive, engaging, and user-friendly, ensuring a seamless user experience

Web Developer

Eurosia, Technopark, Trivandrum - Jun 2013 – Nov 2017

- Specialized in web development using JOOMLA, CodeIgniter, and Core PHP.
- Successfully developed and integrated new features, enhancements, and updates into existing projects to meet business objectives
- Implemented UI integration and optimized user interactions to deliver a seamless and engaging user experience

Junior Web Developer

WDS Technologies, Cochin - Mar 2012 – Nov 2012

- Converted PSDs to responsive HTML/CSS and Joomla templates customization

Notable Projects

- Citus Health – www.citushealth.com
- HealthforAnimals – healthforanimals.org
- Centr.org – www.centr.org
- IDF.org – [idf.org](idf.org)
- Vichsec.org – vichsec.org

Self Driven Projects

Node Task Manager – Role-Based Access (Node.js, Sequlize, JWT)

A secure CRUD API for managing tasks with user authentication and role-based authorization.

- Built using Node.js and Express, backed by MongoDB.
- Implements JWT-based login for users with different roles (admin/user).
- RESTful API architecture for task creation, retrieval, updates, and deletion.
- Middleware-driven access control based on user roles.

[React Food Order App](#) (ReactJS)

A responsive food ordering interface simulating a real-time user experience

- Browse menu items, manage cart, and place orders.
- Designed with component-based architecture.
- Implements useState/useEffect for UI interactivity.

[React Quiz App](#) – ReactJS

An interactive quiz game application with real-time scoring.

- Multiple-choice questions with result tracking.
- Simple state management using React hooks.
- Mobile-first, fully responsive layout

Education

- MSc Computer Science 2007 — School of Computer Sciences, Mahatma Gandhi University, Kerala
- BSc Computer Science 2005 — S N College, Alappuzha
- Drishya Multimedia — Drishya Multimedia, Alappuzha
